

DARSH SOAM

Cloud & DevOps Engineer | AWS | Kubernetes | Docker | Terraform | CI/CD | Linux

Meerut, Uttar Pradesh, India | +91-9548461976 | darshsoam2006@gmail.com | linkedin.com/in/darsh-soam-42a605324 | github.com/darshsoam07

PROFESSIONAL SUMMARY

3rd-year B.Tech Computer Science student specializing in Cloud and DevOps Engineering, with hands-on experience deploying and automating infrastructure using AWS, Docker, Kubernetes, Terraform, and CI/CD pipelines. Skilled in Linux administration, Git-based version control, and Infrastructure as Code (IaC), with growing expertise in AI-powered and agentic applications. Seeking entry-level Cloud Engineer, DevOps Engineer, DevSecOps Engineer, Platform Engineer, or Site Reliability Engineer (SRE) roles.

TECHNICAL SKILLS

Cloud (AWS): EC2, S3, VPC, IAM, RDS, Elastic Load Balancing (ELB), CloudWatch, Route 53

DevOps & Infrastructure: Linux, Git, GitHub, Docker, Kubernetes, Terraform, Infrastructure as Code (IaC), CI/CD, GitHub Actions, Deployment Automation, Containerization

Programming: Python, Java, Bash, SQL, Data Structures & Algorithms

Web & Software Engineering: HTML, JavaScript, REST APIs, Flask, SQLite, Tailwind CSS

AI / Data: Generative AI, Agentic AI, LLM Applications, Retrieval-Augmented Generation (RAG), LangChain, Machine Learning Fundamentals

Security: DevSecOps, Secure CI/CD, Infrastructure Security, Container Security

Databases: Oracle Database, SQLite

PROJECTS

Expense Tracker with Insights

HTML, Python, SQLite, Tailwind CSS, JavaScript

- Built a full-stack expense management web application with user authentication, CRUD operations, category-based filtering, and dashboard analytics for tracking spending patterns.
- Implemented CSV export and persistent data storage using SQLite, enabling users to back up and analyze transaction history outside the application.
- Designed a responsive, interactive interface with Tailwind CSS and JavaScript, structuring the backend in Python for maintainable data handling.

Cloud / DevOps Deployment Workflows

AWS, Docker, Kubernetes, Terraform, GitHub Actions, Linux

- Provisioned and managed AWS infrastructure (EC2, VPC, IAM) using Terraform, applying Infrastructure as Code principles to enable repeatable, version-controlled deployments.
- Containerized applications with Docker and deployed them to Kubernetes clusters, practicing pod scheduling, service configuration, and container orchestration.
- Built CI/CD pipelines with GitHub Actions to automate build, test, and deployment stages across AWS-based environments, reinforcing Git-based source control workflows.

EXPERIENCE & TRAINING

AI-Powered Cloud Engineer Virtual Internship

2026

Virtual Internship / Training — Cloud, AI, Automation

- Applied cloud engineering concepts through an AI-focused lens, connecting AWS-based workflows with automation and intelligent, agent-driven applications.

CERTIFICATIONS

- Oracle Agentic AI Foundation Associate — foundational Agentic AI concepts and AI agent workflows for cloud and software engineering.
- OpenAI: Applied AI Foundations; Agents and Workflows; LLM and RAG Basics.

EDUCATION

Meerut Institute of Engineering and Technology (MIET)

Aug 2024 – Aug 2028

B.Tech, Computer Science Engineering — Meerut, Uttar Pradesh

- Relevant coursework: Cloud Computing, DevOps, Software Engineering, Data Structures & Algorithms, Python, Java, Databases, Cyber Security.

Dayawati Modi Academy

Mar 2023 – Mar 2024

Class XII — India
